- ✓ Fixed billing – no variable airtime billing
- ✓ No Capex required
- ✓ Pro-active fleet management and risk mitigation
- ✓ VESA/ABS certified
- ✓ Meets ISO and SANS Standards
- ✓ Meets SAIA standards
- ✓ Leaders in Jamming mitigation

PULSTRAC FLEET
GPRS

Our comprehensive fleet management solution is for commercial fleets operating within the borders of South Africa. This solution can be upgraded to a cross border tracking option with the addition of a global roaming sim card which will be limited to live tracking in areas with GSM coverage or you can upgrade to a full satellite hybrid solution which includes a Iridium satellite modem for uninterrupted tracking and management.

In association with:

www.pulsit.co.za

Our solution offerings are tailored for all aspects of real-time asset management and monitoring from basic tracking for insurance purposes to comprehensive logistics and risk management.

Apart from cost-effective vehicle tracking, Pulstrac Fleet GPRS also offers the fleet manager hands-on control over vehicle usage, optimization and event management. Our telemetry offers comprehensive vehicle and driver behaviour information, monitoring and management.

Some of the vital vehicle information and event alert capabilities of our GPRS tracking devices includes:

- Over speeding alerts
- The fleet manager will receive real-time event information as well as the option of automated daily speeding reports.
- Harsh driving events
- Severe harsh events
- Driver scoring
- Accident analyses (second by second reporting)
- Panics
- Battery disconnect and unit tamper alerts
- Pro-Active unit health checks and reporting
- Jamming detection

Additional value add options:

- Cold chain temperature monitoring
- Cold Chain Compressor on/off event reporting
- Door open/close event reporting
- PTO on/off event reporting
- Trailer on/off hook event reporting
- Fuel tanker handrail and valve box monitoring
- Driver Identification
- CanBus – vehicle engine data

The Pulstrac on-board terminal is robust and offers exceptional reliable service and is over the air configurable to meet with client specific requirements.

Pulsit offers advanced monitoring and management user applications which includes:-
