**TRAILER-TRAC**  
powered by: Pulsit Electronics  
**GPRS**

Pulsit has more than 20 years experience in real-time tracking, fleet management, vehicle telemetry, risk mitigation and mobility solutions.

Pulsit provides best of breed asset tracking, telemetry and fleet management solutions underpinned by next generation GPS/GPRS and GPS/Iridium satellite tracking systems, state of the art technology and application specific software, unparalleled service, 24 7 call centre, bureau and stolen vehicle recovery services

## THE PULSIT DIFFERENCE

- ✓ NO CONTRACTS - month to month rental agreements
- ✓ Wide range of tracking & telemetry solutions to cater for most logistics and fleet operators needs
- ✓ Fixed billing – no variable airtime billing
- ✓ No Capex required
- ✓ Pro-active fleet management and risk mitigation
- ✓ VESA/ABS certified
- ✓ Meets ISO and SANS Standards
- ✓ Meets SAIA standards
- ✓ Leaders in Jamming mitigation

**Our solution offerings are tailored for all aspects of real-time asset management and monitoring from basic tracking for insurance purposes to comprehensive fleet, logistics and risk management.**

Apart from cost effective trailer tracking, the Pulsit Trailer-Trac GPRS tracking unit also offers the fleet manager hands on control over trailer utilisation, optimisation and event management such as trailer disconnect, backup battery low alert and tamper.

This terminal has the capability to offer comprehensive utilisation and movement information, including service interval management and licence renewal notifications.

#### **Additional value add options:**

- Cold chain temperature monitoring on reefers
- Cold Chain Compressor on/off event reporting
- Cargo door open/close event reporting
- PTO on/off event reporting
- Trailer on/off hook event reporting
- Fuel tanker handrail and valve box monitoring.

The Pulstrac on-board terminal is robust and offers exceptional reliable service and is over the air configurable to meet with client specific requirements. The tracking unit is securely mounted inside an anti-tamper steel housing.

Pulsit offers advanced monitoring and management user applications which includes:-

A Comprehensive web-based fleet management application which includes, but not limited to the following core features:

- Grid view with vital on-screen vehicle status and information
